There is no conference fee and a limited budget for non-ATARD COST Management Committee members

ABOUT ATARD

Air transport is generally considered to be a key factor for the economic competitiveness of the most developed regions of a country and for the social welfare of the less developed ones, which often are remote regions difficult to access through other transport modes. However, the relationship between air transport and regional development has not been fully investigated considering all the relevant dimensions. Building advanced knowledge about such relationships, with a focus on Europe, is the main reason for this Action.

More details on the action can be found at <http://www.atard.net/>.
